About:

Front-end developer with 1 year of study, seeking first the internship opportunity in the field

Knowledges:

I have experience in developing Multi-Page Applications (MPA) using HTML5 and CSS3, with a focus on styling and responsive design. I consume REST APIs and implement dynamic interactions using JavaScript. I use TypeScript for type safety, static typing, and maintainable code. I have created and managed databases with Supabase, integrating and consuming data on the front-end. I also develop Single-Page Applications (SPA) with React, applying component-based architecture, state management, and routing. For styling, I utilize Bootstrap and TailwindCSS for fast and standardized interface design, and SASS/SCSS for organizing, reusing styles, and applying logic in CSS structure. Additionally, I am experienced with Git and GitHub for version control and project hosting. I have English proficiency for reading, writing, and speaking at a B1 level.

Experience:

B&B Catalog - *Freelancer | November 2025*

Developed a responsive website using HTML and CSS. Created databases for item storage and integrated data consumption on the front-end using JavaScript.

GateBoard - *Personal Project* | December 2025 - February 2025

Developed a Single-Page Application (SPA) with React and TypeScript, implementing component-based architecture and routing. Implemented authentication with persistence via localStorage and structured the application using types and enums.

Education

Technical Degree in Internet Informatics

IFPE – Federal Institute of Pernambuco | February 2023 – December 2025

Studied programming logic, computer maintenance, server creation with Linux, PHP, HTML, and CSS.
